SUMMARY

I'm a senior website developer with 7 years of experience, building websites from concept to completion. I handle both the front end and back end of WordPress websites, including hosting, servers, and domain management. I specialize in designing and developing user-friendly, responsive websites using modern technologies and best practices. My expertise includes building e-commerce and corporate websites, optimizing website speed, implementing SEO best practices, integrating APIs, and creating custom hooks and functions.

WORK EXPERIENCE

Manager / Senior Website Developer **Sept 2023 - Present**

BURK DIGITAL

- Managing the team workload using Agile sprints, analyzing the project requirements, and ensuring the client requirements are met.
- Managing different servers and domain registrars (Cloudways, WPMU Dev, Bluehost, GoDaddy, Cloudflare, Square, etc.).
- Create custom functions using (JS, jQuery, and PHP) to create an interactive website, extend plugin functionality, perform DOM manipulation, and create component animations.
- Create Advanced Custom Fields (ACF) and dynamic page templates for clients and publishers to speed up post creation/publication, prevent any layout or design issues from breaking, and to make sure all posts will have a uniform layout and design across their post type.
- Set up API integration for WooCommerce shipping, payment gateway, and third-party CRM.
- Optimize websites for performance, security, and scalability.
- Ensuring cross-platform optimization from Desktop, Tablet, to Mobile devices.
- Capture leads using GTM, GA4, and Google Ads. Set up conversion actions like add_to_cart and purchase events.
- Implement SEO best practices, including image, On-page SEO, semantics, and website speed optimization.

React JS Developer **July 2026 – October 2026**

Upstream Teches

- Built a library of reusable React components and page templates, which speed up development and kept the design consistent across the site.
- Integrated RESTful APIs with an Express JS backend so content and data stayed dynamic and up to date.
- Set up client-side routing with React Router for fast, smooth navigation between pages without full reloads.

- Delivered a fully responsive layout with Tailwind CSS, optimized for desktop, tablet, and mobile.
- Debugged and resolved UI, API, and performance issues to keep the site stable, fast, and reliable.
- Wrote modular, maintainable code that makes future updates and new features easy to add.

Digital Marketing Developer **Nov 2021 - Aug 2023**

GoFluent Philippines, Inc.

- Managing and planning the corporate and client websites on WordPress using a custom theme, Gutenberg and Divi.
- Create dynamic pages, build custom theme plates, resuable blocks & functionality, increase website performance, perform SEO and website localization.
- Responsible for website migration, single page redirections, and geotargeting for advertisement and marketing.
- Create wireframes, user journey, and QA testing.
- Setup google analytics and google tag manager.
- Coordinate and collaborate with different teams across the globe to deliver exceptional digital/web output.
- Resolve issues on the website and coordinate with the Marketing Ops and Global Marketing Team.

Website QA **March 2021 - Nov 2021**

OptimizeX Inc.

- Perform QA checking such as cross-browser compatibility, website responsiveness, design & content, functionality, links, and redirections.
- Create workflow & work around process, user journey, user manuals, and documentation research for the latest QA tools.
- Build and use computer-assisted software engineering(CASE) tools to automate the writing of some codes.
- Create a test automation script using selenium, C++, Java, and JavaScript.
- Monitor website performance, search engine ranking, and checking client requirement.

Digital Specialist **Aug 2019 - January 2021**

Asian Datawords 24/7 Philippines Inc.

- Configuration and adaptation of website using different Content Management System(CMS) such as DRUPAL, WEZEN, PIM, HYBRIS, as well as the most powerful WordPress.
- Capable to develop a static and dynamic website from desktop to mobile-responsive designs.
- Maintenance, integration, and update of brands' websites.
- Quality assurance of digital support across desktop and mobile environments.
- Capable to used Adobe Photoshops and Adobe Illustrator to edit products.
- Work on several projects requests simultaneously while meeting tight deadlines.

EDUCATION

Bachelor of Science in Computer Engineering **2014-2019**

University of Perpetual Help System Dalta

- During my college days, I've been working on different projects like Robotics, System Development, Web Development, and Programming.
- In the year 2019, I also received a proficiency award for our thesis titled "Automated Farm Management and Monitoring System".
